

K-Calibre® U-Style Secondary Belt Cleaner

Cost-effective & Superior Cleaning Performance all in one.

K-Calibre U-Style Belt Cleaner maintains a constant and uniform contact pressure across the whole width of the conveyor belt. Ideally used in applications where slurry and sticky carryback is present or excessive water removal is required. Tungsten carbide blades deliver optimal cleaning performance, whilst vulcanised into a rubber mount absorbing any impact energy which minimises the transmission back into the conveyor belt, providing a belt friendly solution. Blades are supplied as a single piece unit for easy slide-in and out replacement.

Key Features & Benefits:

Excellent Elasticity

- Tungsten carbide vulcanised into rubber mount.
- Belt Friendly.

Versatile Spring Tensioner

- Simplicity and economy of use.
- Low Maintenance.

Specification:	
Belt Width	600-2000mm
Belt Speed	
Polyurethane Blade	≤ 4 m/s
Tungsten Blade	≤ 6.5 m/s
Cleaning Direction	One direction only
Blade Material	Tungsten Carbide or Polyurethane
